

# UNIMAX ENDO POCKET SERIES

Patented technique offers easiest application of endo pocket

## CapSure™ Rip-stop Endo Pocket

Unimax endo pocket is a patented device which offers quickest and easiest application of endo pocket. This unique technique allows the bag to be detached from the cannula with least steps and left within patient abdomen during procedure. Alternatively, Unimax endo pocket can also be used without detaching the bag. Either way, Unimax endo pocket promotes efficiency of the procedure and shortens procedure time.

### PATENTED DETACHMENT TECHNIQUE

- Unique patented technique ensures quick and easy detachment of the bag from the handle. The ergonomic handle design allows for smooth rotation and manipulation of the product

### COMPLETE RING

- Continuous enhanced metal ring ensures large pouch opening and keeps the pouch in place when loading specimen

### ROBUST RIP-STOP BAG

- Rip-stop bag with appropriate size prevents breaks and leaks

## RIP-STOP ENDO POCKET

### CapSure™

- Robust rip-stop bag effectively prevents breaks and leaks
- Adequate bag volume enables desired application

## POLYMER ENDO POCKET

### Detachable Version

- Unique design facilitates quick detachment of the bag with least steps
- Strengthened polymer pouch allows safe and convenient removal of tissue specimen

### EndoMini™

- Genuine 5mm introducer design significantly minimizes size of the surgical site

## Basic Version

- with memory wire

- with suture tie

- with introducer

## Adequate Volume For Ideal Applications

	EndoMini™	3" x 6"	5" x 7"	8" x 10"
VOLUME	120 ml	330 ml 240 ml (* CapSure™)	750 ml	1850 ml
